siteCAM™

CCTV System

siteCAM™ is unique to the asbestos industry as a fully integrated system – it offers exceptional value with great quality you can trust.

Metal bodied cameras are designed specifically for on-site use. It is all supplied in 2 durable cases to protect these assets on typical site environments and during transit. A large 19" monitor comes as standard and you have the choice of 4 or 8 camera kits to suit the size of your enclosure. With the option of a fully recordable system (plus 1TB hard drive), you can monitor and record activity if required.

A 30m range infrared motion detector, and day and night vision, ensures nothing is missed. Ideal not only for monitoring the activity within your asbestos enclosures, but also for demonstrating full compliance to current HSE guidelines and potential future legislation.

Developed by Thermac using our unrivalled knowledge of equipment requirements in the asbestos industry we can ensure that siteCAM™ meets the specific needs of this demanding environment.
