

Mini

► General

- Throw 10m
- Aerodynamic composite lightweight cone
- Low noise high efficiency fan
- Adjustable angle of throw

► Water specifications

- A constant inlet press. of 1,5 bar with the rated flow
- No pump
- Waterhose with 1/2" BSP male fitting
- Stainless steel nozzling
- Droplet size spectrum vary from 50 tot 150 micron
- Waterflow max 40l/h

► Electrical specifications

- Voltage 1x110V-230V

► Dimensions and weight

- | | |
|----------|--------|
| • Length | 500 mm |
| • Width | 360 mm |
| • Height | 630 mm |
| • Weight | 15 kg |

Spraystream

Standard machines

The Spraystream Mini is a dust suppression machine that generates a consistent stream of microdroplets to capture airborne dust particles and prevent the escape of fugitive dust. This misting cannon is mainly used for dust- and odour suppression in closed spaces.
