

Mini Trolley

► General

- Throw 15m
- Aerodynamic composite lightweight cone
- Hot dipped galvanized structure
- Low noise high efficiency fan
- Adjustable angle of throw -10° to 50°
- Integrated water filter system

► Water specifications

- A constant inlet press. of 1,5 bar with the rated flow
- HP Pump
- Waterbox filtersystem
- 1/2" BSP male fitting
- Stainless steel nozzling
- HP nozzles
- Last chance filter before nozzle
- Droplet size spectrum vary from 30 to 50 micron
- Waterflow up to 80l/h

► Electrical specifications

- Voltage 1x110V-230V
- Fan (w) 200 (24VDC)
- Pump (kw) 0,75
- Rot. (kw) NA

► Options

- Bigger booster pump(s)
- Pressure detection incl.
- Water cut off valve incl.
- Dosage pump
- Salt water packages

► Dimensions and weight

- Length 1350 mm
- Width 600 mm
- Height 900 mm
- Weight 75 kg

Spraystream

Standard machines

The Spraystream Mini Trolley is a dust suppression machine that generates a consistent stream of microdroplets to capture airborne dust particles and prevent the escape of fugitive dust. This misting cannon is mainly used for dust- and odour suppression in closed spaces. As a result of the compact form and wheels, this dust suppression machine is easily moved and very versatile. The cannon is also available without a trolley.
