

Needle Scaler - Trelawny

Trelawny Tool & Vacuum system (TVS) Shrouded needle scalers are designed for the dust-free safe removal of hazardous materials such as lead, asbestos and silica dust.

- TVS shrouds are retrofittable to all needle scaler models
- Cuffs for flat, edge, and corner applications
- Adjustable for access
- Low air consumption
- Simple maintenance with no special tools
- Available as a needle or chisel scaler for multiple applications
- Unique design, valveless and oversized piston

Applications

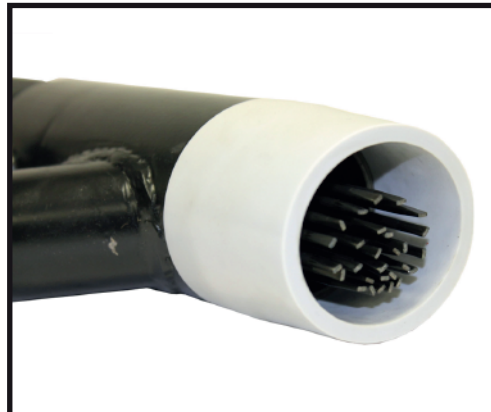

- Removal of coatings, corrosion and other accumulated materials
- Slag removal and stress relieving welds
- Cleaning mixers, formwork and machinery
- Spot repairs
- Cleaning concrete for repair

Service and after sales support

Each unit is supplied with free user-training, warranty and all relevant test certification. Each unit is also automatically logged onto Thermac's computerised auto-recall system: this informs the owner when each re-test is required to ensure ongoing compliance and safety.

Accessories

Cuffs available for flat, edge or corner applications.

Hire or Buy

All units are available to hire or buy and Thermac offers full technical back-up and a first class servicing package.
