

FoamShield 20 Litre

Product Description

FoamShield (FS WF-250) removes textured coatings such as Artex® without emission of harmful asbestos fibres.

This unique Artex remover is made from the most advanced, patented particle-capture technology and eliminates up to 100% of airborne asbestos fibres, as certified by independent laboratory detection tests.

One litre will cover up to 5 sq meters, depending on the coating that you're trying to remove and its thickness.

When fed through Thermac's Foam Machine, FoamShield has a gel-like consistency, and is designed to cling to the surface that is being stripped. This includes ceilings if necessary.

Features:

- Water-based
- Non toxic
- Non caustic
- PH neutral
- No fumes
- No skin burns
- Non flammable
- Non combustible
- Product requires no ventilation
- Clings 100% to all surfaces
- Keeps wet for long periods
