

DL2000 Dust Collector

The new DL2000 is built on a rugged steel frame with washable integrated filters. These filters are simple to maintain and reinforced in a sturdy float-and-flow system. The dust collector exceeds HEPA standards and is equipped with a Longopac endless bag system.

Included with the DL2000:

- 1 x Longopac endless bag system
- Inlet slide damper: OD 1.97"
- Hose adapter: 50 mm (2")
- Antistatic PVC hose: d. 50 mm / 7.5 m

Recommended Accessories:

- Additional Longopac endless bag system
- Additional Primary Filters

Specifications:	
Material	Steel
Dimensions: W, H, D (mm)	500, 1200, 560
Weight	55.2 kg
Voltage	100/110V
Frequency	50/60 Hz
Vacuum Pressure	2.5 m H ₂ O
Air Movement	400 m ³ /h
Filter Efficiency	99.995 @ 0.14 microns
Noise Emission	74 dB (A)
Inlet	50 mm (2")

Safety: Individually tested HEPA filter with a minimum efficiency of 99.995 percent at 0.14 microns; a rugged steel frame provides support during transport and use.

Heavy-duty, anti-static collection hose provides durability and safety.

Performance: State-of-the-art telescoping side arms for a highly portable machine that can be packed away easily for storage, or expanded for use. This dust collector has a manual valve for pulsing the filter and shaking residual dust from it.

2 motors on this machine enable you to pair different sizes of grinders and shot blasters and increase its versatility in rental.
